Precipitation probability					
10%	10%	30%	30%	20%	20%

Forecast for Sunday 30 Jun 2024

Weather: Largely cloudy with some brighter spells at times but also the risk of the odd shower, these tending to be fairly light. Winds fairly light but feeling somewhat cooler.

Chance of cloud-free hill tops above 800m: 60%.

Low Cloud and visibility: Scattered cloud bases in the morning obscuring hills above 600m gradually lifting to 800-900m often shrouding the higher tops and bringing some poorer visibility, particularly in association with passing showers. Generally excellent visibilities at lower levels away from showers.

Freezing Level*	2200m	2200m	2200m	2200m	2300m	2500m	2300m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Conditions changing quickly with elevation and some significant wind chill possible at height so be prepared if heading to the higher tops. Strong sun and high UV levels also likely in any brightness through the middle of the day.

Forecast for Monday 01 Jul 2024

Weather: Overcast cloud for much of the day with extensive low cloud during the afternoon. Spells of rain likely during the morning, with a brief drier interlude mid-morning before further rain and drizzle in the afternoon.

Maximum wind: Westerly 15-20mph gusting 25-30mph

Chance of cloud-free hill tops above 800m: 20%.

Low Cloud and visibility: Largely cloudy with periods of low cloud down to 400-500m at times, and spells of rain and drizzle particularly early and late in the day bringing some poor visibility at height. Visibility better at lower levels, particularly during the afternoon.

Temperature: **Valleys:** Plus 11 Celsius, rising to 15 Celsius.
At 800m: Plus 5 Celsius, rising to 8 Celsius.
Freezing level: Above summits.
